

(TMI Focus, Vol. XVII, No. 4, Fall 1995)

FOLLOWING THE DOLPHIN WAY

The Dolphin Energy Club was formed in 1991 to promote emotional and physical health and wellness. The more than three hundred DEC members use a special audiotape containing Hemi-Sync® frequency patterns based on brainmap studies of those skilled in alternative methods. The dolphin qualities of compassion and joyous service imbue this work. Many DEC members are already familiar with holistic modalities such as Reiki, therapeutic touch, kinesiology, and polarity therapy, and Hemi-Sync is complementary.

When a request for DEC assistance comes in, ten members of the network are asked to focus consciousness over a two-week period on behalf of that individual. They are informed by postcard, FAX, or e-mail of that person's first name, physical location, and the condition to be addressed. DEC members and the DEC recipient return report forms to TMI. Reporting indicates that DEC efforts are an effective response to mental, emotional, physical, and spiritual anguish. Reports are kept on file, and the membership receives an overview of results on a quarterly basis. News of research with dolphins and items of related interest are also included in DEC mailings.

To submit a DEC request, please provide the above information, as well as the recipient's mailing address so we may send a report form. If the request is being submitted by someone else, the recipient **MUST BE INFORMED AND MUST HAVE CONSENTED** before it can be processed. DEC support is available to DEC members, their friends and families, and anyone who is in need.
